innovations - Dept. of Food Science

2nd EDITION

The Kwame Nkrumah University of Science and Technology (KNUST) has opened a state-of-the-art Digital Forensics Laboratory at the College of Science in the University. The Digital Forensics Laboratory was jointly commissioned by the Vice-Chancellor, Professor Kwasi Obiri-Danso and the Inspector General of Police (IGP), David Asante-Apeatu.

The establishment of the digital forensics Laboratory is through the collaborative efforts of the CoS and the e-Crime Bureau Limited, a cyber security and investigations specialist firm, to support the running of a digital forensics science programme at the University.

Our team of professionals include an experienced Medical Doctor, a Dietician, an Exercise Physiologist, Clinical Psychologist, and fitness instructor.

The KNUST Wellness Centre is a medical, nutritional and fitness consultancy Centre hosted by the College of science created to promote preventive health over curative health. This stems from the fact that, most diseases could be prevented. However, due to poor eating & dieting, lack of good exercise, inadequate education, access and non-regular medical checkups, people die needlessly.

As part of the community engagement activity, Mobile lab was invited to the GLOW/BRO Camp 2017 at Nuaso in the Eastern Region organized by the US Corps Volunteer group in Ghana. The camp took place at St. Annes Secondary and vocational school. It began on the 11th of September and ended on the 15th of September. However, Mobile Lab spent three days in Nuaso.

DEPARTMENT OF FOOD SCIENCE & TECHNOLOGY

Kwame Nkrumah University of Science and Technology

We Provide Unlimited Services and Food Business Trainings

CF - Composite wheat flour and flour from root and tubers

Cassava CF Yam CF Cocoyam CF Sweetpotato CF Doughnut Mix

Sweetpotato drink Sweetpotato-mango toffee Sweetpotato breakfast food Cassava drink Yam fries

Yam Pasta Yam beef mince Yam pops Chinchin Bread rolls

Pancake mix Cookie mix
