KWAME NKRUMAH UNIVERSITY OF SCIENCE AND TECHNOLOGY
PROVIDING HIGHLIGHTS OF BI-WEEKLY ACTIVITIES IN THE COLLEGE OF SCIENCE - KNUST

KNUST - COS sweep awards
at PACN Congress 2017

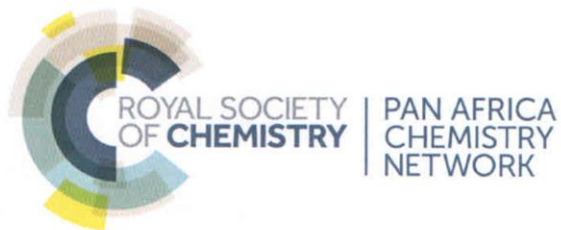

The College extends our
enthusiastic congratulations
to Prof. Amponsah.

CoS Science Cafe

3rd EDITION

The Pan Africa Chemistry Network (PACN) Congress is an annual event for the African chemical sciences community and consists of lectures, exhibitions, posters and networking. This year's PACN Congress was organized by the world's leading Chemistry community, the Royal Society of Chemistry, and was hosted in Ghana from 7th -9th November, 2017 at the Accra International Conference Center. This Congress was held to explore on the topic of "Sustainable Agriculture; How the Chemical Sciences Can Contribute to Food Security for a Growing Population".

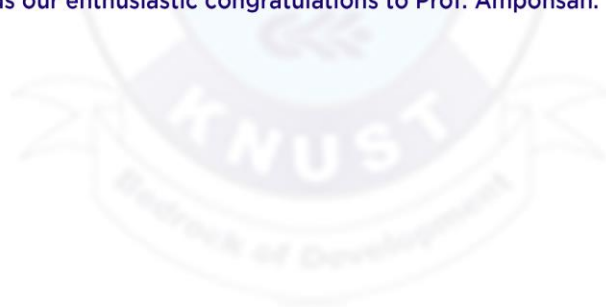

Mr. Francis Asiam and Miss Eugenia Ayebea Asamoah, graduates and current National Service Persons from College of Science, KNUST won the awards for the best poster presentations with 1st and 2nd positions respectively as they presented their undergraduate research works at the Pan Africa Chemistry Network (PACN) Congress 2017.

Prof. S. K. Amponsah

(Dean of the Faculty of Physical and Computational Sciences)

In the November, 2017 edition of Newsletter on Mathematics, Prof. S. K. Amponsah, Dean of the Faculty of Physical and Computational Sciences was tagged as a renowned researcher in the field of Mathematics. His publication titled “Proposed Method for Solving Assignment Problems” has been published in American Journal of Operations Research (AJOR). It is one of the most popular papers in the journal. The College extends our enthusiastic congratulations to Prof. Amponsah.

The College of Science has initiated a forum for a pragmatic approach to solving some social and environmental problems of national concern. The approach is through the use of Science cafe's; an informal meeting to discuss and brainstorm on issues of concern in a free and friendly atmosphere. At a recently held Science cafe' at the Senior Staff Club on the theme "combating water pollution- the role of the quintuple helix" stakeholders from academia, industry, government, media and environmentalists suggested various ways of solving the problem of water pollution in Ghana. There were suggestions to the effect that we should not only concentrate on prevention but also adopt available scientific means of cleaning up the already polluted water. Watch out for the next Science Cafe, most likely to be held in the second semester.

DEPARTMENT OF FOOD SCIENCE & TECHNOLOGY

Kwame Nkrumah University of Science and Technology

We Provide Unlimited Services and Food Business Trainings

CF - Composite wheat flour and flour from root and tubers

A number of novel and improved existing products from local food crops.
Make your orders or be trained for business.

The hub of Modern food Innovations

Contact Us: (+233) 207010712 / (+233) 208 954 223
Email: knust.foodsciencedept@gmail.com

DEPARTMENT OF FOOD SCIENCE & TECHNOLOGY

Kwame Nkrumah University of Science and Technology

We Provide Unlimited Services and Food Business Trainings

1. Solar Dryer
2. Sensory Evaluation Lab
3. Mechanical Chipper
4. Hammer Mill (Medium)
5. Flour Mixer
6. Hammer Mill (large)
7. Attrition Mill
8. Attrition Mill
9. Cabinet Dryer
10. Samples of Food Product

A number of novel and improved existing products from local food crops.
Make your orders or be trained for business.
